

ANANDHALAKSHMI PA

SOFTWARE DEVELOPMENT ENGINEER | FULL STACK DEVELOPER

Phone : 9488126089 | E-Mail : anandhalakshmip16@gmail.com | LinkedIn : <https://www.linkedin.com/in/anandhalakshmip>

SUMMARY

I am a Full Stack Developer with 3 years of experience delivering scalable, cloud-integrated web applications end to end. I build intuitive user experiences with React and engineer reliable backend services using Java Spring Boot and Python. I am currently pursuing an MTech in AI & ML and actively apply emerging technologies to develop practical, production-ready features. I continuously upskill, adapt to new tools, and drive automation and performance improvements in a cloud-first environment.

SKILLS

- **Frontend Development:** React.js, Next.js, TypeScript, HTML5, CSS3, JavaScript, Responsive UI Design, Unit Testing
 - **Backend & APIs:** RESTful APIs, Python Flask, Web Sockets, Java (Spring Boot), Data Base Management, Redis
 - **DevOps & CI/CD:** Git, Webpack, Docker, Microsoft Azure DevOps (ADO)
 - **Software Development Practices:** Agile Methodologies, System Design , Micro-Frontend Design Pattern, Microservice Architecture
 - **Other Tools & Concepts:** Google Cloud Platform (GCP), AWS, OOPs, Data Structures and Algorithms.
-

EXPERIENCE

Software Development Engineer at Mr.Cooper, Chennai

Jul 2023 – Present

- Improved system scalability by engineering robust microservices using Java and Spring Boot on GCP, optimizing performance and enabling seamless cloud deployments.
- Reduced timeout exceptions by nearly 100% by redesigning a tightly coupled backend system using Event-Driven Architecture (EDA), significantly enhancing system reliability.
- Accelerated frontend system performance by designing and implementing scalable, multi-tiered architectures tailored to complex audit workflows.
- Increased team efficiency and cross-functional alignment by leading requirements gathering, technical design documentation, and full lifecycle feature development.
- Reduced manual effort in loan servicing workflows by 30% through backend automation and orchestration strategies, contributing directly to customer satisfaction.

Software Engineer Intern at Mr.Cooper, Chennai

Jan 2023 – Jun 2023

- Built a real-time messaging application using Next.js, Express.js, Redis, and Google SSO, showcasing strong front-end development skills and security integration. Demonstrated adaptability and quick learning by delivering innovative solutions within deadlines.
 - Actively participated in Agile development, collaborating with teams to design, develop, and test applications.
-

EDUCATION

- Masters of Technology in Artificial Intelligence and Machine Learning (WILP) at **Birla Institute of Technology & Science**
Oct 2025 - Present.
 - Bachelors of Technology in Information Technology at **Thiagarajar College of Engineering (Anna University)**
Jul 2019 – May 2023 | 9.2 CGPA
-

PROJECT EXPERIENCE

Pyro AI

- Contributed to the development of an advanced document understanding platform, focusing on front-end design using ReactJS and backend automation with Java Spring Boot.
- Designed scalable state-sharing between tabs and optimized batch processing using scheduling and threading techniques.

AI Guardian

- Part of the core team responsible for the design and development of a secure AI quality-check platform that validates the usage of LLMs across critical business workflows. Collaborated with cross-functional teams to build an internal tool that ensures responsible AI usage, improves output reliability, and supports compliance for various business functions.

Chat Application

- Developed a real-time messaging application using Next.js, Next Auth, Google SSO, Redis, and Express.js.
- Focused on scalability, security, and seamless user interactions to create an intuitive messaging platform.

Fertilizer Recommendation by Disease Classification

- Built a web application for classifying diseased leaves using CNN and Python Flask API. Designed a React.js front-end for users to upload images and receive fertilizer recommendations.
-

CERTIFICATIONS & RECOGNITIONS

- Certified on SpringBoot and Java (Udemy)
- Certified in Web Development with React (Udemy)
- Recognized as *Champion for Customers* at Mr. Cooper for reducing manual processing by 30%
